## “Is it too hot to take my dog along today?”

*That’s a question we need to ask ourselves every time we drive with a dog.*

Warm weather can literally be a killer for a dog left inside a car. Did you know that on warm days, the inside of a car heats up very quickly? When it’s 85 degrees out, the temperature inside a car — even with the windows left slightly open — can soar to 102 degrees in 10 minutes, and reach 120 degrees in just half an hour. On hotter days, the temperature will climb even higher. Outside temperatures in the 70s can be dangerous, as well.

Even leaving your dog for “just a minute” may be too long. A dog’s normal body temperature ranges from 101 to 102.5 degrees. Dogs can withstand a body temperature of 107 to 108 degrees for only a very short period of time before suffering brain damage — or even death.

**It’s not cool to leave your dog in a hot car.**

For more information, visit [www.MyDogsCool.com](http://www.MyDogsCool.com)

*If your dog is overcome by the heat, immediately soak him or her with water and seek veterinary care.*
